

The Centurion Systems

OUR VISION

Empowering creative humans in the age of machines.

A global network. Built on trust. Free to begin.

99

SUPER ADMIN · NETWORK ROOT

CONFIDENTIAL — FOR CENTURION NETWORK MEMBERS ONLY

Abba Yahgi Shop · 2026

The World Has Changed.

We are living through the most disruptive technological transition in human history. Artificial intelligence is not simply changing the economy — it is reshaping the fundamental relationship between human beings and their work.

Musicians. Composers. Songwriters. Visual artists. Filmmakers. The very people whose creativity defines culture are among those most exposed to displacement. Their crafts — once irreplaceable — are now being approximated by algorithms trained on their own work, without consent and without compensation.

“In a world of machines, the most radical act is to remain unmistakably human.”

Our Response.

The Centurion Systems was born from a simple but powerful conviction: creative humans deserve a fighting chance. Not charity. Not sympathy. A real, structured, dignified economic pathway — built on technology that exists today, available at zero cost to begin.

We build free ecommerce stores for musicians, composers, and other creatives around the world. We connect them to a global network of mentors. We track their success. We protect their revenue. And we grow — together.

The Network Structure.

The Centurion Network is a hierarchical system of mentors and proteges. Designed for accountability, quality, and security — every member holds a unique Network ID that encodes their exact position in the hierarchy.

Roles & Responsibilities.

Role	Description	Revenue Share	
Super Admin	Network root. Oversees the entire system. Approves top-level proteges.	—	
Mentor (Admin)	Direct guide to a protege. Responsible for onboarding, support and quality.	2.5%	
Overseer	The mentor’s mentor. Provides second-degree oversight and wisdom.	0.5%	
Legal Fund	Copyright battles, IP protection	1.0%	EUR 10.00
Infrastructure Fund	Cloud, DB, AI agents, future scaling	1.0%	
Protege	The creative entrepreneur. Runs their own store. Keeps the majority of earnings.	95.0%+	

The Network Identification Formula.

Every member’s identity is mathematically encoded. Each mentor can support a maximum of 100 proteges (sub-identities 00 to 99), ensuring mentorship remains personal, focused and accountable — never a mass recruitment exercise.

Protege Network ID = Mentor’s Full ID + Sub-Identity (00 to 99)

Example Network Chain:

Level	Member	Network ID	Digits
0	Super Admin (You)	99	2
1	Your Proteges	9900 to 9999	4
2	Protege’s Proteges	990000 to 999999	6

3	Next Generation	99000000 to ...	8
N	...	2 x (N+1) digits	—

The Revenue Model.

The Centurion Network is built on a foundational principle: **you do not pay until you earn**. Every protege receives their ecommerce store, hosting, and database at zero cost. Revenue sharing activates only when income flows.

How the Split Works.

When a protege generates revenue (exclusive of applicable state taxes), the following distribution applies:

Recipient	Percentage	On EUR 1,000 earned
Protege (Earner)	95.0%	EUR 950.00
Mentor (Direct Admin)	2.5%	EUR 25.00
Overseer	0.5%	EUR 5.00
Legal Fund	1.0%	EUR 10.00
Infrastructure Fund	1.0%	EUR 10.00
Total	100.0%	EUR 1,000.00

The 6-Month Probation Period.

Before a protege receives their own ecommerce instance, they undergo a **6-month probation period** under their mentor's direct supervision. This is not a barrier — it is a protection. It ensures that both parties build a relationship of genuine trust before any economic commitments are made.

Tax & Payout Handling.

In the current phase, all revenue splits are handled manually. The Centurion System dispatches invoice emails to all parties — protege, mentor, and overseer — upon each payment event, providing a clear and auditable record for accountants. This is especially important given the complex VAT landscape across European jurisdictions.

As EU tax automation matures — notably under the VAT in the Digital Age (ViDA) regulation rolling out 2025 to 2028 — the system will be upgraded to support fully automated payouts via Stripe Connect.

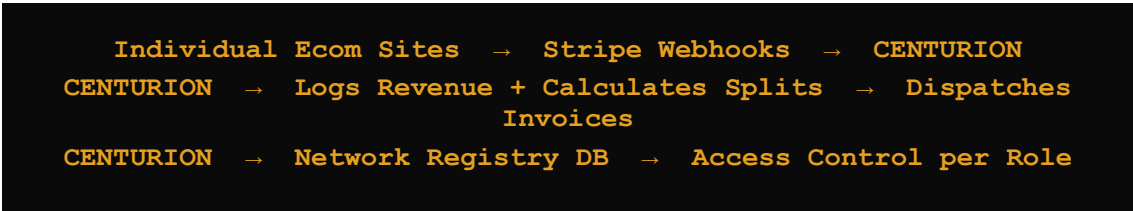

The Centurion System.

The Centurion is the central nervous system of the network. It operates independently of all individual ecommerce stores — a separate FastAPI application with controlled read-access to every store database and revenue stream in the network.

What Centurion Does.

Revenue Tracking	Receives Stripe payment webhooks from every store in the network. Logs every transaction against its Network ID in real time.
Ledger Management	Maintains a clean, auditable financial ledger per protege. Calculates mentor and overseer cuts automatically on every payment.
Invoice Dispatch	Automatically emails formatted invoices to all three parties — protege, mentor, and overseer — upon each payment event. Full paper trail for accountants.
Network Registry	Maintains the master registry of all Network IDs, their database connection strings, and hierarchy relationships.
Access Control	Grants mentors read-access to their proteges’ store data. Overseers can view their entire second-degree network. Proteges see only their own store.
Future: Auto Payout	When EU tax systems mature, Centurion will trigger automatic Stripe Connect transfers — eliminating all manual steps from the revenue split process.

Architecture Overview.

Our Values & The Road Ahead.

What We Stand For.

Human First — Technology serves people. Never the other way around.

Trust Over Contract — The network runs on honour, relationships, and proven track records.

Radical Accessibility — If cost is the barrier, we remove it. Full stop.

Creative Dignity — Musicians, composers, and artists deserve sustainable economic lives.

Transparent Accountability — Every transaction is visible. Every invoice is documented. No hidden hands.

Patient Growth — We build slowly and carefully. The network is only as strong as its weakest relationship.

The Roadmap.

Phase	What	Status
Phase 1	Perfect the ecom store template. Free, beautiful, and fully functional.	In Progress
Phase 2	Onboard 2–3 pilot proteges. Learn what breaks. Fix it.	Upcoming
Phase 3	Launch Centurion — revenue tracking, ledger, invoice dispatch.	Planned
Phase 4	Scale globally. Expand to music, clothing, health and beyond.	Vision
Phase 5	Full payout automation via Stripe Connect as EU tax systems mature.	Future

*“The network protects its own.
Create freely. Grow together.
This is the Centurion way.”*
